

Freeman Ranch Advisory Council Grants

In previous years, Freeman Ranch has received a line-item fund from the State Legislature, and some of this money was available for to students conducting research projects on Freeman Ranch. Funds are contingent upon the line-item and the Freeman Ranch Advisory Panel. Please contact the current ranch manager for information.

Former student Scott Egan submitted a proposal in 2003. He was funded for \$1,000. Here is the letter of agreement:

April 16, 2003

Mr. J.P. Bach,

As per our agreement I am requesting that you hire Mr. Scott Egan (Biol. Dept. grad student) at the wage \$10.00 per hour for the upcoming summer season.

Scott has been awarded a grant from the Freeman Ranch Advisory Council in the amount of \$1000.00 for this current fiscal year.

This award was matching grant award. I support his request to use his funds for wages as this is the way to best further his research at this juncture.

This research is centered on understanding the relationship between live oak quality and a specialist herbivore. Scott's research has been conducted exclusively at Freeman Ranch. It is my understanding that Scott owes the Freeman Ranch Advisory Council an end of project report. I will see to it that this report is delivered to you in a timely fashion.
